

AI Video Analytics & ByteTrack Tracking Report

Video File: video_1785751678993_742072693.mp4 | Generated: 2026-08-03 15:39:12

1. Executive Summary

Automated AI vision tracking using YOLOv8 + ByteTrack was completed for **video_1785751678993_742072693.mp4**. The video was processed across **334 frames** (Duration: 13s, Resolution: 768x432). A total of **1 unique people** were assigned persistent tracking IDs. Maximum simultaneous occupancy reached **1** with an average occupancy of **1.0**. Crowd level was evaluated at **Very Low (2.0%)** based on a store capacity benchmark. Total footfall registered **0** (Entries: 0, Exits: 0) with an average detection confidence of **79.2%**.

2. Key Analytics Summary Table

Metric Parameter	Recorded Value	Benchmark / Context
Unique Tracked People	1	ByteTrack persistent unique tracking IDs
Current Occupancy	1	Visible tracked individuals in final frame
Maximum Occupancy (Peak)	1	Highest simultaneous tracked count
Minimum Occupancy	1	Lowest simultaneous tracked count
Average Occupancy	1.0	Mean tracked individuals per frame
Crowd Occupancy Rate	2.0%	Density Level: Very Low
Total Footfall Count	0	Entries: 0 Exits: 0
Average AI Confidence	79.2%	Range: 50.2% - 90.4%
Total Frames Processed	334	FPS: 25.0 Resolution: 768x432
Processing Execution Time	71.11 seconds	Real YOLOv8 + ByteTrack runtime

3. Object Class Statistics

Category	Count	Percentage
Person (Tracked)	1	100.0%

4. AI Insights & Recommendations

"Automated YOLOv8 + ByteTrack video analysis completed for video_1785751678993_742072693.mp4 (13s). Tracked 1 unique individuals across 334 frames with ByteTrack persistent ID mapping. Peak simultaneous occupancy reached 1 (Avg occupancy: 1.0). Crowd density evaluated at 2.0% (Very Low Status) relative to store capacity (50). Registered 0 entries and 0 exits with an average detection confidence of 79.2%."

- Unique shoppers tracked: 1. Ensure shelf layout maximizes engagement for peak traffic zones.
- Current crowd density level is Very Low (2.0%). Align staff allocation with peak occupancy windows.
- Recorded 0 entrance line crossings and 0 exit crossings.
- ByteTrack persistent tracking maintained across 334 frames with 79.2% average confidence.
